ArtsPool was incubated by A.R.T./New York and launched as an independent company in December 2014. ArtsPool's members are nonprofit arts organizations that share a team of administrators and a technology platform that handles finance, workforce administration, and compliance.

ArtsPool's goal is to save time, control costs, and elevate output in these core administrative areas to help arts organizations stabilize and strengthen their operations, allowing them to focus more time and resources on their artistic, programmatic, and strategic work. Members of ArtsPool's team will be on hand to explain ArtsPool's core functions, share information about membership, and to respond to your questions.
