We are currently casting for on an upcoming UNIQLO advertisement for Print and TV .

for one part of the project we will need a trio of female tap dancers. "performing" together.

we will be auditioning some solo acts to combine talent for the scene ...but we would prefer a group of women who dance together, or have danced together, or know each other at least - as this helps with chemistry.

(by audition i only mean put you on film, more casting than a skilled audition)
