Looking for several featured male and female dancers for a music video/fashion film that features transparent fashions and sensual movement. There will be no nudity of any sort, but you must be comfortable with dancing in front of the camera wearing somewhat revealing clothing in a private/sensual way.

No technical skill necessary - it's more important that you have an interesting/unique look and are comfortable with improvisation. Video will be fashion-oriented and very tasteful.

For examples of prior work: www.allieavital.com

Video will be pitched to major music and fashion websites, and we will feed you well and give you beautiful footage for your reel!
