Recruiting dancers, musicians and non-dancer/musicians for Neuroscience research study at Columbia University

Company: Columbia University

► [Share](#) | [Print](#) | [Download](#)

How do you respond to sound?
Are you a **Dancer? Musician? Neither?**

Research Volunteers Needed
Sound perception study using eye tracking

Where? Teacher's College Columbia University
(120th Street and Broadway, NYC)

Risks? None
Benefits? Watch your study results post participation; receive any publication made from the findings
Duration? 15 minutes
For more info contact: scl2143@tc.columbia.edu

Teachers College, Columbia University
Institutional Review Board
Protocol Number: 15-435
Current Term Approval Date: 07/16/2019

If you live in or are visiting the New York City area and are a dancer, musician or non dancer/musician, consider participating in neuroscience research, created by a dancer, in an effort to better understand why we dance or create music. Your participation will involve coming up to the eye tracking lab at Columbia University and will take up to 15 minutes of your time. At the moment, there is no monetary compensation available. However, at the end of your participation you can see your results and get a better understanding of the mechanisms behind the neuroscience of dance or music after a short debriefing. Please contact the email in the flyer (scl2143@tc.columbia.edu) for more info. Thanks!
