VOLUNTEERS WANTED FOR A RESEARCH STUDY

Are you a pre-professional dance student over the age of 18?

We are conducting a research study about sensory input and balance control in dancers. We are looking for:

- Reliable undergraduate dance students with at least five years of training in ballet or contemporary dance.
- May have prior history of ankle sprains, but no other major injuries in the past six months

Participants will complete several questionnaires and then perform balance tasks while in virtual reality (VR) environment. Participation entails approximately two hours of your time.

This research is conducted under the direction of Elizabeth Coker, EdD, Tisch School of the Arts, NYU and Anat Lubetzky, PT, PhD, Steinhardt School of Culture, Education, and Human Development, NYU.

[illegible]

Seeking volunteers to participate in a scientific study of balance and injury in collegiate dancers. Please see accompanying flyer for more information.

NYU/Tisch
