Phil Mahabeer

Hi all,

I'm interested in doing a test shoot collaboration with someone in the very flexible to contortionist range.

We'll shoot in the city and park.

The idea is to get interesting shots using a wide angle so we'll play around with Angle, Distortion and Location (Benches, Trees, etc.).

This will be a fun and creative way to show your skills and ability to adapt to a camera's focal length so is a good option for someone wanting to gain comfort on camera as well.

You can be as creative and whimsical as you'd like as well so could be great for content.
