Description:

Jason Herbert Dance invites expressive and dedicated movers to join the creation and premiere of *On The Rocks*, featured in the Uptown Rising Fall 2025 Showcase.

On The Rocks explores the miraculous transformations sparked by science and weather phenomena—forces that mirror the ever-evolving human experience. At its core, the work celebrates renewal: the power to become new versions of ourselves each day, even after life's unexpected storms.

The narrative follows a group of artists living seemingly simple lives—until an environmental shift upends their world. Disoriented and reshaped by life's elements, they find strength in vulnerability. Like the sunrise after a storm, they recover, revive, and renew. This new ballet embraces emotional unrest while offering a vision of hope, humor, and healing.

The process will unfold over two live, spontaneous rehearsals, emphasizing collaboration, creativity, and discovery.
