Body, Mind and Image: Classes will investigate experiential anatomy through the lens of Body-Mind Centering®, developed by Bonnie Bainbridge Cohen, focusing on specific systems of the body (skeletal, organ, nerves, fluids, glands), and imagery and the physical imagination through Ideokinesis and the work of Mabel Todd (The Thinking Body) as learned from and with Andre Bernard. We will explore qualities, textures, thought processes and movement analysis applicable to creative expression, performance and healing modalities.
