Dancehall is a unique and expressive style created within Jamaican culture. Derived from Reggae music, this style has its own culture and dances that have been created by individuals and dance crews from Jamaica and around the world. This specific style became known in the mid to late 80s and has become popular ever since. In this class students learn the history of Dancehall culture as they master classic steps to corresponding riddims, choreographies and freestyle techniques. Each class includes a warm-up covering old, middle and new school dances that are danced at dancehall/ reggae parties across the globe. For the second half of the class, students incorporate these dances into choreographies and freestyles set to the hottest Dancehall tunes. At the end of class, students perform for each other, developing confident and bold self-expression- the foundational element of Dancehall culture. Through learning these energetic and fun dance, students will become stronger, more knowledgeable and dynamic dancers.
