Forza Dance creates empowering opportunities to research and share our collective purpose as artists through our two facets: Community and Company. With free or low cost programming, Forza Community aims to support the artist's journey, build a dialogue on the "now" and the "next" for the dance industry, and facilitate exchange of these ideas to all ages and experience levels. Forza Company is a performance-based collective that puts these Community findings to motion. The company intends to inspire a more empathetic society by sharing work with the public. In all events, Forza Dance cultivates a sustainable learning environment that uses feedback to ignite change in both the self and the dance industry.
