[MELT: Joined at the Hips- Exploring the Hip Joints](#)

For many dancers, the area of the hip joints can be a place of great tension, immobility and frustration. In this workshop, we will sink into the hip sockets, examining the role they play in transmitting freedom, both to the legs and to the rest of the body. Using anatomical information, directed touch and image, we will enter states of inner listening through slow, sensory investigations. We will actualize our discoveries and insights through dancing, alone and together. [REGISTER HERE!](#)
