Danspace Project

131 E 10th Street

New York, NY 10003

This workshop will be a week-long intensive on how to use expansion and reduction through the body, movement and choreographic structures in the creative process. Each workshop begins with a 45-minute physical propulsion technique class to organize the body. This will be followed by a 45-minute movement lab where we will work collaboratively to investigate how we can allow for variations in dynamics within our performance structures and settings.
