□Performance Art Installation - Lotusnova :Between Shadows and Lights□

An immersive art installation and performance that explores the ever-shifting nature of truth through origami, the body, and projection. It begins with a decaying lotus, unfolds into a wandering body emerging from the swamp, and breathes new life through the act of folding. This work invites the audience into a shared space of questioning —seeking what truth might mean in a world where nothing stays the same.

In today's increasingly diverse world, even "truth" is in constant flux. Shaped by time, environment, and conflict, once-accepted truths sink like mud beneath our feet. Everyone speaks of happiness, yet so few seem able to grasp it— How, then, do we find our own truth in this modern chaos? Through origami, physical expression, and projection mapping, this work creates a shared space for reflection.

I hope you can experience a sense of quiet philosophy and visual novelty within the atmosphere we build together.
