Anthony Pepitone

Delicate Web, the 2nd section of a larger work, entitled "Earth Trilogy" is an artist's statement about global warming. A collaborative work with a multi-generational cast, Delicate Web depicts how humankind has destroyed the precious natural world that we as a species have taken for granted and alludes to the issues that we might be facing unless we take extremely dramatic action. The work premieres this week-end at this performance and also on 5/18 and 5/19 as part of our larger work, ["Earth Trilogy" for "Take Root" at Greenspace](#)
