Criteria for selection and context:

Movement Research (MR) continues to serve as a creative laboratory and incubator for emerging artists and ideas. The Movement Research at the Judson Church series is one of a number of MR programs intended to foster rigorous and wide-ranging artistic investigations and nurture experimentation in movement-based forms. An ongoing, free, high-visibility low-tech forum in front of a live audience, this series attracts diverse intergenerational artists at all stages of their creative development and audiences from the dance community and general public. Because MR supports creative process, not final product, the Movement Research at the Judson Church series is for exploration of ideas, not a venue for finished work on a season's presentation. Proposals are reviewed by a rotating committee of artists.
