Venice International Art Fair 2021 analyzes the relationship between body and space, and the hybridization between identities and cultural/physical/social/urban settings in contemporary time, through two main sections: LIQUID ROOMS and FUTURE LANDSCAPES.

LIQUID ROOMS analyzes the hidden parts of our identities, through an immersive experience inside the fascinating universe of the complex labyrinths of our consciousness. The human body is a changing system that connects us with other bodies and spaces to perceive the surrounding reality; a strong communication system with its own language and infinite ways of expression.

FUTURE LANDSCAPES are abstract, infinite and conceptual, associated with a sense of freedom and infinite extension. Primarily experienced with the mind, spaces redefining their limits and borders, transforming surfaces in open flow of pure ideas. This section focuses on the concept of the borders and the structures between body, mind and soul, the human identity and the city, the space and the ground.
