A new story ballet to the music of Ian Axel. About An Extraordinary Echo: Progression and polarization, globalization and global climate change, information overload and the Internet; this is the world of the Echo Boom Generation, Generation Y. Through contemporary ballet set to classically infused pop music, the characters of An Extraordinary Echo come of age as they grapple with their ability to inspire change and build a hopeful future. An Extraordinary Echo is a celebration of life and explores a generation's desire to push the human race forward.
