What makes a Performance Autism Friendly?

Learn more about our program Arch for Autism -->

This performance has one hour running time, no obscure lighting or sudden sounds, the music is lowered to a comfortable volume, social narrative available for preparation, an autism specialist will be present in the lobby in case anyone needs to leave their seat early, or needs quiet time in our designated quiet room. It also is a supportive environment where audience members can enjoy dance with their families on the spectrum – making noise, wiggling in your seat, and talking is supported and is a safe space at our performance.
