TRIAL CLASS: \$25

Using simple techniques of collage, drawings and assembling, students will create a story first, then act the story and build puppets from simple elements such as an apple, a paper plate, a plastic cups etc.

Each lesson includes different elements of music, dancing, movement and acting. The students will prepare the puppet show by making up the show themselves and rehearsing with the puppets. They will learn how to improvise, freely create and then shaping such improvisation into a show.

Teacher Laura Caparrotti will provide visual aids such as videos and books to best explain students what a puppet is and how it works, and will also show how the theater works using masks and puppets.

Each lesson will include some words in *Italian*. Notes with Italian dictionary will be provided. Before the final show each student will show what Italian language they have learned.
