Pangea: Unearthed is the culmination of one of our core tenets: that the dancer's body is an archive which holds incredible stories. This performance puts those stories at center stage by giving the artists of Pangea Dance Collective the unique opportunity to choreograph and present their original works on the company. Join us this October for a beautiful outpouring of artistry, passion, and phenomenal dancing as we unearth the inner power of the dancer's creative voice! Featuring four Pangea world premieres!
