Mario Sorrenti

The Cristin Tierney Gallery will present the first livestream performance emerging from a collaboration between Arts at CERN, the official arts program of the European Organization for Nuclear Research (CERN) and the Integrated Arts Research Initiative (IARI) at the Spencer Museum of Art at the University of Kansas (KU).

The experimental performance will include a live dancer, Vinson Fraley, and musician, Earl Maneein, layered with video footage from CERN that has been manipulated by mathematical techniques used in quantum mechanics.

The focus for the Integrated Arts Research Initiative's (IARI) 2021–2022 inquiry is a collaboration with Arts at CERN, the official arts program of the European Organization for Nuclear Research (CERN). Participants include New York–based video and performance artist Janet Biggs; Associate Professor of Mathematics at KU Agnieszka Miedlar; and Associate Professor of Physics at KU Daniel Tapia Takaki. Please check this page for news and updates on the project.

You can access a livestream of the performance for free at <https://vimeo.com/event/833942>

Arts at CERN-IARI Collaboration
 Remote only, no live attendees
 New York, NY, 10002

Schedule
 April 8, 2021: 7:00pm
