Tony Turner

The Game Show Version # 6 (Sense) is an interactive performance investigating compatibility through farcical notions of our intrinsic animal instinct versus our intellectual discernment.

A woman with her eyes closed selects men from the audience using all of her five senses, including her 6th sense which is represented by a slow dance. She cries in the shower, plays tic tac toe on her heart, listens to her horoscope, her Jewish grandmother, poets, and finds happily ever after, as the winners of game shows often do.
