Amy Babic

This holiday season, American Liberty Ballet brings its own NYC-based version of the Nutcracker to the stage at the Theater at St Jean's in Manhattan.

"The Nutcracker: Welcome to New York Suite-y," is a delightfully twisted take on the holiday classic that follows Clara, Fritz, and family on a visit their grandparents and Uncle Drosselmeyer in (where else?!) but New York, Suitey!

Clara and Fritz are two troublesome siblings who are always fighting! But when Fritz is kidnapped by her pet rat, Clara and her Nutcracker must search the city to find her. From Subway Performers to a Vegan Bakery in the Village, this original ballet is a love song to NYC and will definitely captivate the entire family!

Premiering as the Rat Queen we have ALB Principal Lindsay Johnson, The Snow Queen will be performed by radiant ALB Principals Anastasia Federova, a former member of the Kremlin Ballet, and Analia Farfan founder of the International American Ballet. This years Sugar Plum will be performed by ALB Principal Hiroko Kodaira who hails from Japan and will stun you with virtuosic technique like you've never seen.

Concept, storyline, and choreography by ALB Artistic Director Valerie Mae Browne directing a company of over 20 artists as well as students from ALB's official academy.

Join us for a non-stop flight of fun at the Theater of St Jeans on 76th Street and Lexington Ave in Manhattan.

Dates:

January 6th: 3:00 pm and 7:00 pm

January 7th: 3:00 pm
