Puzzle by Lois Greenfield

Daniel Gwartzman Dance Company, renowned as a family-friendly performing and teaching company, now celebrating its twentieth anniversary, offers the newest installation of its hit interactive kids show series "Welcome To The World of Dance," which The New York Times called "a delightful introduction...explaining what contemporary choreography is all about." A narrated primer of how to view and speak about dance, Gwartzman and Company present a range of acclaimed dances from the Company's diverse, accessible, and entertaining repertoire.

"The dancers then take the lesson several thrilling steps further by inviting the young audience members to join in. By the time the last strains of the score from Saturday Night Fever were heard, most of the adults were on their feet, too."
